Our Process continued...

Our products are packaged in our facility, next to where our hemp is grown as it enables us to control the quality of the product. Because there are no middlemen involved in our cultivation, harvest, extraction, and packaging, we're able to provide high quality hemp products at an affordable price range.

About Us

At Canine Hemp Solutions we have put together a special blend of premium full spectrum hemp extracts that are formulated with other natural ingredients specifically to assist calm, relieve, and promote general wellness in your dog no matter the breed or size!

Our Process

Our hemp is cultivated on our property all year round. The hemp is then harvested and dried before being milled by a pharmaceutical grade knife mill to create the purest form of hemp pulp. This allows us to ensure that FRESH, clean, and pure hemp is used as an ingredient in our final products versus stale, old, or moldy hemp...

TOP 3 PRODUCTS

Canine Hempflavin 30mL Tincture formulated to be used for severe body aches, muscle soreness, and other pain relief by creating a synergistic flavonoid response known as the "flavonoid entourage effect." Flavonoids are compounds that occur naturally in fruits, grains, and vegetables and are thought to provide health benefits through their antioxidative effects. **100%THC Free!**

Hempflavin Derm Spray

A Topical spray formulated with ozonated coconut oil that acts as an antimicrobial, anti-parasitic and helps activate cell growth with Hempflavin that is a natural anti-inflammatory and assists with discomfort. The aloe helps manage skin irritation, alleviates itching, all while creating a barrier between irritation and outside irritant to promote healing.

Canine Calming Chews

A great way to administer an all-natural & healthy supplement that is essential to your dog's health. Simple ingredients with maximum results! Assists with calming, anxiety, joint and/or muscle discomfort, pain, and inflammation relief.

Cannabinoids Are For Canine's Too!

CANNABINOID GUIDE

Testimonials

"Ariel loves her canine hemp solutions chews. They help her itching, cleared up her redness, helps her digestive system, and anxiety." - J.B

"My almost 15yr old Great Dane (in March). Because of her age she is thin. She couldn't get up without help before the canine hemp oil, now she can unless she on the wood floor. She can actually lope across the yard. Her hips have gotten bad with age, but this has helped tremendously. All of my vets are not only shocked at her age but also how she gets around now." - T.M

"Our 11yr old mix-breed, Mayham. The Canine Hemp Pulp & calming chews has greatly helped his back hips, improving mobility, restlessness digestion, and coat health!" - S.M

When our owner tasked me to look for a new cannabis product for our pet health store, Doctor's Hemp Solutions immediately caught my eye. They had an interesting product called Hempflavin, and after speaking with the Hemp Solutions team and doing our own research, I decided to try it on my own dog Guinness before we decide to sell it to our customers.

Guinness is a 5-year-old full bred English Mastiff who happens to weigh a whopping 275 pounds! Our family owns a pet health food store in which we grind our own raw pet food, so I knew his diet is the best that we can give him, he just needed something else to help him out. Guinness has an ongoing issue of getting up off the ground with his back legs because of his weight, so we tried putting him on a CBD regimen, which works, but makes it him sleepy. Then we tried Hempflavin. Guinness had an almost immediate effect when taking his first dose as he started to get up off the ground way faster than normal and over the next couple of days, we started noticing that he was feeling livelier. No more sleepiness and a lot more walking around. He is now doing things that he has never done before like lifting his leg to pee and squatting to use the rest room. This sounds like normal behavior for dogs, but for Guinness, it was not an easy task because of the strain of his back legs.

I can now say he is doing extremely well on the Hempflavin regimen, and it seems like we got our old puppy back. I would definitely recommend this product to anyone as it has affected Guinness's and our family's life in very a positive way.
